## **DETAILED ACTION**

### ***Allowable Subject Matter***

**Claims 63-70 are allowed in view of the prior art.**

The following is an examiner's statement of reasons for allowance:

As to claim 63, the prior art of record, taken alone or in combination, fails to disclose or render obvious an evanescent sensing device, in combination with the rest of the limitations of claim 63.

The prior art of record, such as the article "Demonstration of an optimized evanescent field optical fibre sensor" by Z.M. Hale et al., discloses the fact that tapering an optical fiber to expose its evanescent field for use in sensing various specimens is well known in the art. The prior art, however, fails to show this evanescent field sensing used in the manner claimed, wherein the tapered fiber is used in sensing a measurand surface, the signal generated by which is then combined 180 degrees out of phase with light carried through the system by a reference fiber. This combined signal is then detected at a photodetector to determine the distance between the tapered fiber section and the measurand. The evanescent field sensing in the prior art is mainly used for absorption sensing using dye cells rather than a physical distance measurement as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
